

KONICA MINOLTA

DISCREET AND FLEXIBLE MOBOTIX DUAL-LENS CAMERA

Ensure students' safety as they come and go.

Flexible up to 10 feet, the S16 has two discreet video modules to be connected. The whole system is weatherproof and supports a microphone inside each lens. Mobotix's S16 mobile solution for school transportation can be customized where standard cameras won't fit to capture and record video and audio. Now parents can relax knowing that the school transportation's being monitored and accountable for ensuring kids make it to and from school safely.
